**HAROLD GORE PUBLISHING COMPANY  
314 S ELM ST • DENTON, TEXAS 76201**

After more than 25 years, and many hours of arranging on the computer, Harold R. Gore can now say that all of John P. Sousa's marches are available in concert format, along with their full scores. Some of these copyrighted and published marches are only now finally available for purchase and performance for the first time. All marches are listed in the catalog with prices for the complete set(s), including score, yet all scores and parts are available separately as well.

Even though the sets are listed as edited or arranged, they are actually the authentic music, with only minor changes (i.e., C Piccolo instead of Db Piccolo; F Horn in place of Eb Horn; Percussion parts separated into Timpani, Mallets, Snare Drum, and Bass-Drum/Cymbal combined; Euphonium (Baritone) written out for both bass and treble clefs). A few of the marches are in different keys, when deemed desirable for performances' sake. Other than the aforementioned changes, the Sousa marches are authentic, with the exception of concert size versus march size, and the inclusion of a full score. Some of these marches are likely unknown to many band directors, but are nonetheless great pieces of music. It is hoped that now even more bands will program Sousa's music, in order to educate and entertain audiences on the history and value of his work.

None of the Sousa marches in this catalog have been simplified; rather, they have all been corrected of mistakes that may have been made in the original versions. If any of the pieces are used for contest purposes, extra full scores are always available.

# SIGHT-READING & WARM-UPS

## 21 Progressive Chorales with Related Scales

### H.R. Gore

A warm-up book of chorales and scales, organized in common band key units, which each begin with the major and related minor scales of the presented key. Following the scales are three exercises in chorale and/or fugue form; many times the major and its relative minor forms are demonstrated within one chorale (exercise). The first of the three is easy, with the two following (per unit) each becoming more complex. However, none of the chorales, based on works of J.S. Bach, L.N. Clerambault, and Francois Couperin, are difficult. By playing the chorales slowly, in a legato style, with an emphasis on breath control, an ensemble can focus on phrasing, balance, intonation and specific tonality.

## Daily Warmups

### Don Hanna

Now you can quickly and easily address proper playing fundamentals on a daily basis by stressing development of good pitch. Properly implemented, *Daily Warmups* will develop discriminatory listening skills for good blend and balance which will result in a more productive rehearsal, a better performance and higher contest ratings.

Advanced Bands	12238800	\$65.00
Young Bands	12238900	\$55.00

## Scales & Rhythmic Figures for Band

### Don Hanna

Concerts and performances can be prepared in less time when students are strong fundamentally with rhythm, technique, tone quality and strong listening skills. *Scales & Rhythmic Figures for Band* is designed to accomplish these goals through development of technical proficiency and reading skill. The twelve major scales are presented in the circle of fifths in reverse order, beginning with B $\flat$ . Each scale is followed by the major, dominant 7th and diminished arpeggios which leads to the next major scale. Minor scales are presented in all three forms. There are three chromatic scales; two of which are scored for the full band to play together and one with the full practical range for each instrument. *Rhythmic Figures* is comprised of 83 measures, beginning very simply and graduating in difficulty to the final 8 measures which are marked "champions only." The student who can count all these figures will be well prepared with rhythmic-reading skills.
